Isabelle Wolf

COLOR your lifestyle

The slightly different color book

Live a more colorful life!

Isabelle Wolf chats away effortlessly, revealing her fascinating color knowledge along the way.

Red is love, green is hope? Forget about it and learn what the different colors and their personalities are really all about.

Isabelle Wolf brings color characters to life: she interviews bubbly child star Orange, pins down eccentric Schiaparalli pink on a funny wanted poster and reveals the interrogation record of the most infamous poisoner of all time: Scheeles green.

Discover how red ensures that women are contacted more often on dating sites, seniors regain their vision and Brits don't walk into their mailboxes. How blue helps you get rid of unpleasant guests or extra pounds and write brilliant emails. Why in Caspar David Friedrich's opinion, blue was anything but faithful and how green creates harmony at home and even makes potential suiciders climb back down from bridge railings.

Witty, educational, light-footed – the author mixes a fizzy cocktail of pop culture, art (history), fashion, living, lifestyle and color psychology, garnished with a good shot of humor.

ISABELLE WOLF

Isabelle Wolf, born in 1979, studied journalism, German studies, film studies and art history. The common thread that runs through her work was and is the topic of "color": as an editor for an art book publisher, as the author of a guidebook ("Was Farben sagen", Goldmann 2011) or as a color expert for a major German paint manufacturer. She creates color and furnishing concepts for private homes and has been interviewed by Homes and Gardens, Madame, Jolie, freundin and WOHNDESIGN, among others, on color effects and design.

Free yourself from neurological issues using biological decoding

Take solving your neurological issues into your own hands. Biological decoding enables you to systematically decipher, understand, feel and improve the root causes of your neurological issues. Neurological issues can drastically restrict us in our daily lives. Although there are many options to treat the symptoms, we usually have to address the underlying causes if we wish to achieve long-term improvement. Oftentimes, the causes and neurological programming errors are well hidden; identifying them can be tedious but rewarding.

In this book, experienced therapist Angela Frauenkron-Hoffmann shows how biological decoding helps significantly improve your symptoms - without any risks or side effects!

Health codes for a good life.

Isabella Paulsen **The circle of life**

Impulses for living a healthy, balanced life
in times of change

Unique oracle cards to inspire you and gently accompany you through changes in your life.

Oftentimes, we perceive life as linear. From A to B. One thing after the other. But in doing so, we ignore that everything operates in cycles: the dance of day and night, the rhythm of the seasons and the cycle of nature.

Do you long for a deeper bond with the cycles of life? Do you wish to be embedded in the circle of existence? This beautiful deck of 45 colorful, circular cards represents the phases of transformation in Traditional Chinese Medicine, offering important impulses for the stages in your life. They help you gain deep insights for yourself, your rituals and your interaction with others.

ISABELLA PAULSEN

Sometimes the deepest crises bring the most beautiful treasures to light. This was the case for Isabella Paulsen. As a young working mother in the exciting agency life of Berlin, she felt empty and burnt out. Something was missing. Her health was failing, she was separated from her children's father, and so began a journey away from "life according to plan"

and into uncertainty. My own yoga practice, her own yoga practice, coming to terms with being a woman and the transformation phases of TCM helped her to live through the change. Her experience is reflected in the Circle of Life, and so this set of cards encourages change and gives a clear YES to life.

Today Isabella is a yoga teacher and her Womanhood workshop series is very popular. The first watercolor circles were created as companions for these workshops and are now popular as postcards and original paintings. www.fullcircleyoga.de

Is it possible to simply flip a switch and instantly get rid of annoying behavioral patterns or agonizing traumas? By switching genes on and off? How is this supposed to work?

Discover the fascinating world of epigenetics and learn how to solve familial, karmic or collective issues up to the gene level to finally break the chains of the past. We can control our genes!

Therapist Gabriele A. Petrig, an expert in epigenetic practical work, shows us that we aren't at the mercy of our genes. We decide for ourselves which of the imprints that we have or inherited (and may have been present in our ancestral lines for centuries) we are finally going to delete. Likewise, we can decide which genes we want to activate in order to finally be able to realize our full potential.

In this groundbreaking book, the author not only provides a clear, easily comprehensible introduction to the research field of epigenetics, but she also unveils her Genetic Healing Method where energy work meets scientific findings, ensuring that everyone can successfully control their genes. She passes on her knowledge in seminars and training courses and is the author of various specialist books and numerous specialist articles on family constellations and mental training for children, young people and teachers. SPIRITUALITY & ESOTERICISM

Grażyna Fosar & Franz Bludorf
Connected intelligence

Collective consciousness & hyper-communication of
all living beings

Is our DNA going online?

Everything in the universe is interconnected via frequencies. We are living within a huge network comparable to a cosmic internet—that we are dialing into via our DNA!

But what exactly does this mean? Are all living beings really interconnected via hyper-communication? Which role does gravitation play in this system? And can we now finally explain baffling phenomena like synchronicity or telepathy in a way everyone can understand?

With renowned interlocutors like Stephen Hawking or F. A. Popp, the authors discuss exciting research findings in quantum physics, astronomy, medicine and consciousness research. Moreover, they critically examine established theories, offering an exceptional scientific book without any numbers or formulas that leaves no questions unanswered.

Nothing is what it seems!

Birgit Rusche-Hecker

Soul dogs – therapists with a thick skin?

Understanding the dog at our side will expand our own consciousness.

Your dog behaves awkwardly and no matter how good a training or treatment method is, it has not been effective? In this case, it may be advisable to have a closer look at yourself because many dogs react to mental wounds of their humans. By mirroring traumatizations of their humans in various ways, dogs draw their humans' attention to those traumatizations in order for them to become aware of them and heal them. For dogs, this is very, very exhausting and it gets under their and other humans' skin as well. Out of love, they carry a huge load for their humans, and sometimes the souls of those dogs themselves can collapse under it.

This book wants to show dog owners:

- how their dog mirrors them,
- why they feel the way they feel,
- where their suffering might come from,
- how to relieve their own internal distress, and
- how to unburden their dogs by doing this.

Using examples from her own practice, the author shares her advice from decades of experience as a systemic family and trauma therapist and introduces us to a practical 6-step program we can use to bring our lives and our dogs' lives back on a new harmonious track.

BIRGIT RUSCHE-HECKER

Birgit Panjari Rusche-Hecker (born in 1967), is an alternative practitioner of psychotherapy and a systemic family therapist. The main focus of her work is the relationship between humans and animals. She passes on her knowledge in seminars and advanced trainings.
